251-159

Indice sistematico per numeri successivi del periodico

QC
1
L462

N. 1 5 Maggio 1984

pag.

1 C. Guiot – Generalized mean-field method with four-body interactions.

8 P. K. Smrz – A bimetric theory of Klein-Kaluza type.

11 E. B. Manoukian – A class of toy (functional) universal models with confining « monopole » configurations.

15 S. Minami – Photon-photon interactions around 2.1 GeV and the $g_T(2160)$ meson.

19 S. Madivanane and M. Venkata Satyanarayana – A note on the relation between q-algebras without interaction and Weyl commutation relations.

23 M. N. Mahanta – Five-dimensional origin of the massless scalar field.

27 M. Hayashi – Constraint on the number of neutrino species from the recent $\bar{p}p$ experiments.

32 P. Bocchieri and A. Loinger – Quantum laws and Aharonov-Bohm effect. (Erratum.)

N. 2 12 Maggio 1984

pag.

33 A. Scalia – Some remarks on the generalized critical-distance model for heavy-ion fusion.

37 M. Bruschi and O. Ragnisco – On the solution of a linear matrix equation.

40 G. Faraci and A. R. Pennisi – Momentum transfer dependence of the spectral shape for incoherent two-plasmon excitation.

45 R. Bruzzese – Comparison between experimental and theoretical results on discharge constriction in XeCl* lasers.

53 H. Aspden – Boson creation in a subquantum lattice.

58 M. De Vito and P. Pantano – Deduction of the Kadometsev-Petviashvili equation for magnetosonic waves.

63 J.-F. Roux – An exact diagonal expression for the Hamiltonian of a spin-1 particle with anomalous moment in constant nonuniform magnetic field.

N. 3 19 Maggio 1984

pag.

65 C. Di Bartolo – Lorentz covariance of the Abelian antisymmetric quantum field theory in any gauge.

70 D. D. Holm and B. A. Kupershmidt – Planar incompressible Yang-Mills magnetohydrodynamics.

73 F. Simoni, P. Aiello and G. Barbero – Effect of elastic anisotropy on the nonlinear optical properties of a nematic cell.

pag.
77 M. Nishioka – Remarks on the noncanonical commutation relations of the four-vectors of the energy-momentum operators.
81 B. N. Onwuagba – Local-field correction in the lattice dynamics of b.b.c. transition metals.
89 H. Sakuyama and K. Watanabe – An interpretation of high-energy hadrons in EAS.
94 S. Ahmed – A one-dimensional system at equilibrium.

N. 4 26 Maggio 1984
pag.
97 Y. Kobayashi – A fermion mass relation and prediction of the top-quark mass in a composite quark-lepton model.
102 B. Léauté and G. Marcilhacy – A new transcendent solution of Einstein-Maxwell equations.
107 C. Pellacani and R. Lupini – Bifurcations of the modal structure of internal waves in a fluid induced by a spatially periodical variation of the hydrostatic stability parameter.
111 A. G. Agnese – A naive approach to the quantization of the microscopic and macroscopic world.
115 R. A. Tello-Llanos – Gauge invariance of Dirac's generalized mechanics.
121 M. T. Teli and D. Palaskar – Electromagnetic-field equations in the six-dimensional space-time R^6.
126 J. Pian and C. S. Sharma – The weak semi-differentiability in quantum mechanics.

N. 5 2 Giugno 1984
pag.
129 J. Burzlaff and D. H. Tchrakian – Vortex solutions in the Yang R-gauge.
135 V. R. Manfredi – Level density fluctuations of interacting bosons.
140 A. Italiano and E. Recami – Friedmann cosmology and hadron properties.
145 A. A. Berezin – Two exactly solvable models for the collapse of the particle to the center in a nonrelativistic quantum mechanics.
147 A. Riccardi – A new term in the recursive expansion of the inverse Baker-Campbell-Hausdorff formula.
154 F. Calogero – A remark on the Korteweg-de Vries equation.
157 S. Iwao – Statistical mechanical basis of multiparticle production at high-energy collisions in the gluon-quark picture.

N. 6 9 Giugno 1984
pag.
161 S. M. Bilenky and B. Pontecorvo – Reactor experiments and solar-neutrino problem.
165 Ph. Droz-Vincent – A relativistic discussion on the wave function and classical orbits.
169 B. Ferretti – On the existence of a minorant of the indefiniteness for the measurement of a position.
171 I. Guarneri – Energy growth in a randomly kicked quantum rotator.

pag.
176 A. Bisi, G. Consolati, G. Gambarini and L. Zappa – An unexpected magnetic-field effect on positronium.
179 S. Wojciechowski – On a functional differential equation related with the integrable many-body systems in an external field.
182 M. D. Roberts – Do quantum effects exclude the possibility of black holes?
185 R. K. Colegrave and E. Kheyrabady – The strangled harmonic oscillator.
190 O. Costa de Beauregard – Simple remarks concerning relativistic thermodynamics.

N. 7 16 Giugno 1984
pag.
193 G. Careri and A. Giansanti – Deuterium effect in the dielectric losses of wheat seeds.
197 S. K. Ghosh and E. Tettamanti – Molecular self-diffusion in the isotopic liquid phase of the homologous series of 4-cyano-4′-alkylbiphenyls.
201 M. A. Rego Monteiro – Axial anomaly in any even dimension with dimensional regularization.
205 A. Scalia – Elastic scattering and fusion process in heavy-ion reactions.
209 E. Fuschini and A. Uguzzoni – Local diffusion coefficient in crystals.
216 J. A. Ibáñez and A. F. Tejerina – Membrane system permeability and concentration change.
223 M. F. Podlaha – Note on the Cohen, Moses and Rosenblum letter about the slow-clock transport synchronization in noninertial reference systems.

N. 8 23 Giugno 1984
pag.
225 A. Sym – Soliton surfaces. - IV: Topological charge for «nontopological» solitons.
232 M. Novello, J. M. Salim and E. Ruckert – Nonlinear photons in the universe. - II: The anisotropic case.
235 C. Cercignani, L. Galgani, E. Montaldi and M. Sirtori – Quantization *à la* Nernst for the plane rotator.
240 G. Pizzella – On the band width of resonant gravitational-wave antennas.
243 H. Sakuyama and K. Watanabe – Implications from the KNO scaling violation found by the UA5 experiment at the CERN $p\bar{p}$ collider.
247 G. Calucci – An explicitly solvable example of statistical bootstrap.
250 A. Jannussis – Quantum equations of motion in the finite-difference approach.

N. 9 30 Giugno 1984
pag.
257 W. Garczyński and J. Stelmach – Probing space microstructure with Compton scattering.
261 Z. Malarski, R. Szostak and S. Sorriso – Infra-red and Raman investigations on the multimeric structure of α, α-dicyclohexyl-cyclohexanemethanol.
265 J. Rayski – Quantizable form of the theory of gravitation.
269 C. Di Mauro and G. Giaquinta – Gapless superconductivity and vortex-antivortex pair dissociation in dirty 2D superconductors.

pag.
277 H. C. Chandola and B. S. Rajput – Doppler effect of subluminal and superluminal sources in eight dimensions.
284 Y. Koide – Three-fermion model of quarks and leptons with SU_5-GUT$\times$ $\times SU_3$-family.

N. 10 7 Luglio 1984
pag.
289 H. Snellman – Local duality and the Thomas-Fermi model.
292 M. Aoki – Comment on « Constraints in Quantum Mechanics » by Picca.
295 M. Leo, R. A. Leo, G. Soliani and L. Martina – The eigenvalue problem for the three-wave resonant interaction via the prolongation structure.
300 Y. Funatake and Y. Sakamoto – Inelastic regeneration of neutral kaons.
305 B. Ram and V. Kriss – Baryons in a quark-diquark model based on the Bethe-Salpeter equation.
309 M. Nishioka – An introduction of gauge field by the Lie-isotopic lifting of the Hilbert space.
313 M. Nishioka – A remark on an application of the Lie-admissible lifting to the unstable state.
317 M. Novello and L. M. C. S. Rodriguez – Bifurcation in the early cosmos.

N. 11 14 Luglio 1984
pag.
321 A. Moroni, I. Iori, G. Prete, F. Gramegna and G. Viesti – Nitrogen isotope identification by Bragg-curve spectroscopy.
325 D. G. Long – A nonequilibrium universe of stars and radiation.
329 T. Wada, Y. Yamashita and I. Yamamoto – Search for (4/3)e charged leptons in cosmic rays.
336 Ph. Droz-Vincent – A generalization of Dirac formalism of quantum mechanics.
339 C. G. Koutroulos – Spinor formulation of the general 20-dimensional Gel'fand-Yaglom wave equation base on the representation $(\frac{1}{2}, \frac{3}{2}) \oplus (-\frac{1}{2}, \frac{3}{2}) \oplus (\frac{1}{2}, \frac{5}{2}) \oplus$ $\oplus (-\frac{1}{2}, \frac{5}{2}) \oplus (\frac{1}{2}, \frac{3}{2}) \oplus (-\frac{1}{2}, \frac{3}{2})$.
345 M. Berrondo and R. Jáuregui – On the spectral representation of the electron propagator.
348 S. M. Moore – Amplitude and phase fluctuations in a noisy cavity.

N. 12 21 Luglio 1984
pag.
353 G. C. Scalera – Local models violating Bell's inequality by time delays.
362 M. Hatzis and J. Paschalis – The $\gamma\gamma \leftarrow \rho^0\rho^0$ process in the context of VDM.
369 L. Bosi – The Franck-Condon principle: considerations on the correctness of its formulation.
373 S. Iwao – Mass inequalities among hadrons.
377 D. B. Cline – On the physical origin of same-sign dileptons produced by neutrino interactions.

N. 13 28 Luglio 1984

pag.
385 S. M. Moore – Spin relaxation and electromagnetic vacuum fluctuations.
390 M. Dersarkissian – Does wave-particle duality apply to galaxies?
395 G. Pibiri, P. Randaccio, A. Serra and A. Sollai – Ozone climatology over Western Mediterranean Sea.
401 A. De Rosa, G. Inglima, M. Sandoli, D. Prosperi, G. Giordano, The LADON Collaboration (R. Bernabei, L. Casano, S. d'Angelo, M. P. De Pascale, S. Frullani, B. Girolami, G. Matone, M. Mattioli, P. Picozza and C. Schaerf) – Multipole mixture contribution to ^{28}Si giant-resonance excitation.
407 R. Rodenberg – Upper bounds on the Higgs mass.

N. 14 4 Agosto 1984

pag.
417 P. Mukhopadhyay – On the modification of the estimated masses of the six-quark states due to pairing effect.
422 B. Antonini and P. Paroli – First experimental verification of the Landau-like theory of spin reorientations.
425 S. Minami – Glueball-glueball interactions and central-hadron production in pp collisions at high energies.
430 A. B. Bell and D. M. Bell – A new black-body equation.
433 M. Ochiai – Systematic derivation of a macroscopic equation and the Fokker-Planck equation by a scaling expansion method in stochastic processes.
438 M. Boiteux and G. Sobotta – Nonlocal gauge fields.
441 K. Shaker Jomaa – On hexons and octons.
443 M. Nishioka – Comment on the absolute maximum temperature of thermal radiation.
446 B. Z. Kaplan – Recent arguments supporting a suggestion to observe pulsars via their direct mode of magnetic-dipole radiation.

N. 15 11 Agosto 1984

pag.
449 G. Cicogna – Searching for periodic solutions of nonlinear systems.
453 M. K. Mukherjee – A generalized characterization theorem for quantum logics.
457 A. L. Philippetis and P. N. Poulopoulos – Energy migration between the molecules of an aromatic compound at high concentration in liquid and solid solutions.
461 T. Kitazoe, D. Matsukula and J. Kodaira – The intermediate mass scale and the fermion mass matrices.
466 J. Bystricky, J. Deregel, F. Lehar, A. de Lesquen, L. van Rossum, J. M. Fontaine, F. Perrot, T. Hasegawa, C. Newsom, Y. Onel and A. Penzo – Analysing power for quasi-elastic pp scattering in carbon and for elastic pp scattering on free protons.
471 M. Guidetti, G. Mezzorani and P. Quarati – Nuclear-polarization shifts in muonic zirconium.
476 B. A. Kupershmidt – Supersymmetric fluid in a free one-dimensional motion.

N. 16 18 agosto 1984

pag.

481 C. Dewdney, A. Kiprianidis, J. P. Vigier, A. Garuccio and Ph. Gueret – Time-dependent neutron interferometry: evidence in favour of de Broglie waves.

488 W. De Baere – On conditional Bell inequalities and quantum mechanics.

493 C. Lo Surdo – On the *a priori* structure of the viscous tensor in a magnetoplasma.

497 F. Cardone – On the numerical structure in the quark model.

501 R. A. Buchl and B. P. Nigam – Single- and double-pion emission in proton decay via three-quark fusion.

505 M. Gentili, I. Massa, G. Vannini, P. Boccaccio, F. Reffo, L. Vannucci, R. A. Ricci and I. Iori – Dynamical-model analysis of intermediate mechanisms in ^{32}S-induced reactions.

509 F. A. Doria, M. Ribeiro-da-silva and A. F. Furtado-do-Amaral – A generalization of Einstein's λ-transformation and gravitational copies.

N. 17 25 agosto 1984

pag.

513 G. L. Braglia and L. Romanò – Monte Carlo and Boltzmann two-term calculations of electron transport in CO_2.

519 R. Fonte and A. Insolia – Influence of the impact parameter on the heavy-ion fusion process.

523 A. Scalia – Determination of the nucleus-nucleus potential from the generalized critical-distance model.

527 G. Erriu, M. Ladu, S. Onnis, J. H. Tang and W. K. Chang – Modifications induced in lipid multilayers by ^{241}Am α-particles.

533 J. F. Marko and M. Razavy – Dynamical symmetries of a class of action equivalent Hamiltonians.

537 P. B. Burt – Intrinsically nonlinear waves in magnetohydrodynamical systems.

540 G. Dattoli, R. Mignani and A. Ranieri – Operational identities and solutions of the Raman-Nath equations.
